ITD Driving Behavior Improvement & Incentive Program

ITD Driving Behavior Improvement & Incentive Program

Purpose:

- To support maintaining ITD Safety performance KPIs related to driving behavior by enhancing and improving trainees' defensive driving behavior
- To promote traffic safety culture among trainees and their communities by encouraging and improving our trainees defensive driving attitude to be role-models in traffic safety
- To maintain trainee's maximum traffic safety inside and outside company facilities
- To prevent trainees' motor vehicle accidents and on-job and off-job incidents
- To encourage trainees to always follow all traffic rules and regulations by engaging trainees and their parents in a unique and dynamic incentive point system

Description

- The program is developed based on point system.
- Points added are positive
- 100 initial positive points are granted to each trainee (APNE/VCGNE) upon DMD installation
- 100 points = the value of SR 5 (as a gift item through Aramco B2B system)
- A trainee is eligible to gain double his/her points by completing any segment without DMD Violations
- If a trainee commits a DMD violation at any point, his/her points will be reset to the initial number (100 points)

Eligibility:

All trainees are eligible upon installing DMD devices

➤ In case DMD is removed for any reason other than graduation, a trainee maintains his/her current number of points with no chance to gain more

Awarding system:

- Requirements for awarding:
 - Installing DMD device on the vehicle he/she is using
- Awarding Frequency: a trainee is eligible to redeem his/her earned points upon completing any segment. If a trainee redeems his/her points, the balance points will be reset to 100.

Geometric Progression (GP)

Geometric Progression (GP) is a type of sequence where each succeeding term is produced by multiplying each preceding term by a fixed number, which is called a common ratio. This progression is also known as a geometric sequence of numbers that follow a pattern. The common ratio multiplied here to each term to get the next term is a non-zero number. An example of a Geometric sequence is 2, 4, 8, 16, 32, 64, ..., where the common ratio is 2

The general form of Geometric Progression is:

- a, ar, ar2, ar3, ar4,..., arn-1Where,
- a = First term
- r = common ratio
- arn-1 = nth term

GP Formula is:

$$a_n = ar^{n-1}$$

The above formula is used to calculate the incentive points progression for trainees where:

a=100

r=2

n=number of completed segment

The below table shows the details of maximum number of points expected to be gained by trainees at any completed segment without DMD violations

Description	Number of Points
Incentive Program "Welcome points"	100
Safety Points by end of segment 1	100 X 2 = 200
By the end of segment 2	200 X 2 = 400
By the end of segment 3	400 X 2 = 800
By the end of segment 4	800 X 2 = 1600
By the end of segment 5	1600 X 2 = 3200
By the end of segment 6	3200 X 2 = 6400
By the end of segment 7	6400 X 2 = 12800
By the end of segment 8	12800 X 2 = 25600

Special Traffic Safety Incentive program

Additional Number of positive points will be added during special traffic campaigns, Breaks and holidays as decided by management to encourage trainees to improve driving behavior and comply with traffic rules and regulations.

Action	Number of Points	Remarks
Pass the special campaign period without Violations (Special Camping period)	TBD by managemnet As per campain requirements	

Point Expiry: Points expire in the following cases:

- When a trainee graduates from the Program.
- DMD removal (points will stop at current number)
- DMD violation: Points will be reset to the initial points (100)

Incentive Amount

Total Incentive Amount = (Total Earned Points / 100) X the value of SR 5 as a gift item through B2B system

Points Redemption:

• Points can only be redeemed upon program completion.

Roles & Responsibilities:

Assign Program committee members Provide necessary support and resources to ensure effective implementation of the program. Annual review and update of ITD (Geometric) traffic safety incentive program Oversee the implementation of the program within ITD Evaluate effectiveness of the program through monitoring improvement of safe driving behavior of trainees **ITD Safety Compliance** Collect feedback from program participants and their guarantors to ensure **Team** effectiveness and further improvement Conduct periodic awareness campaigns to promote and explain the program Ensure ATS update to be in alignment with the program requirements Ensure implementation of the program within respective area Conduct awareness campaigns to promote the program among trainees Updating ATS with the points granted

DMD Violation Types:

	Driving Behavior Violation Type						
Risk Level	Speeding	Tampering	Seatbelt	Fatigue Driving - (Long distances)	Harsh/Full Brake	Rapid acceleration	(Swerving/Drifting)
High Risk	10 Km/Hr higher than speed road limit	First violation	First violation	Continuous driving for 3Hrs and above (no breaks)	Third violation	Third violation	First Violation
Moderate Risk				Continuous driving for 2-3 HRs (no breaks)	Second Violation	Second Violation	
Low Risk					First Violation	First Violation	

Details:

Speed:

- DMD violations are based on road speed limits taking into consideration the traffic police tolerance margin as below:

Tolerance Margin:

- Roads with posted speed limits from 60 to 120 km/h:

Tolerance is 10 km above the posted speed limit

- Roads with speed limit 140 km/h:

Tolerance is 5 km above the speed limit

Tampering:

- DMD device tampering is deliberate attempt to disconnect, disable or damage the device

Seatbelts:

- Seatbelt is mandatory for all vehicle passengers

Violations	Number of Points	Actions
Low Risk	-50	 Notification (SMS , email , Instant call) as per the notification table
Moderate risk	-150	Notification (SMS , email , Instant call)Verbal Counseling
High Risk	-200 Points	 Notification (SMS, email, Instant call) Disciplinary actions (Memo to file-warning notice, Dismissal warning) according to the number of repeated violation
High risk (Exceeding Speeding limits by : 10-20 Km/Hr).	-200 Points	 Notification (SMS, email, Instant call) Disciplinary actions (Memo to file-warning notice, Dismissal warning) according to the number of repeated violation
High risk (Exceeding Speeding limits by : 20-30 Km/Hr).	-300 Points	 Notification (SMS, email, Instant call) Disciplinary actions (Memo to file-warning notice, Dismissal warning) according to the number of repeated violation
High risk (Exceeding Speeding limits by : Over 30 Km/Hr) Reckless driving (Combination of moving violations)	-400 Points	Dismissal warning /Termination

Violation Cancellation:

- A violation might be cancelled by ITD Compliance & Excellence Coordinator based on strong evidence upon his/her discretion
